Summary

Self-learning cybersecurity enthusiast with 2+ years of experience in Linux, networking, programming and penetration testing. improving my skills through hands-on practice on CTF platforms like HackTheBox and enjoy sharing technical writeups and achievements on my GitHub profile.

Education

MFT at NC Academy, Cairo, Egypt

Grade: Expected Graduation 2027

Studying MFT (Modern Financial Technology) at NC academy.

Skills

Programming: python, JavaScript, Bash scripting

Database: MySQL

Web Penetration Testing: Identifying web application's logic, Exploiting vulnerabilities like (Logic bugs, Broken Access Controls 'BAC', CSRF, API testing, JWT attacks,)

Network Penetration Testing: Basic Active Directory Enumeration & Attacks.

Basics Of Binary Exploitation (PWN): Buffer overflow attacks

Web Development: Web development knowledge

Operating Systems: Basics of Windows & Linux

Projects

Solved 10+ HackTheBox machines • [Machines' writeups](#)

Solved machines depends on:

- Web Exploitation
- Privilege Escalation (Windows/Linux)
- Active Directory Pentesting

Languages

Arabic - Native

English - Proficient
